

# Totally Integrated Control with Z-Wave®

## Somfy innovates with...

**embedded Z-Wave® drapery control with the Glydea™ Z-Wave® Plug-In Module.**

The Glydea™ Z-Wave® Plug-In Module is an interface between Somfy's Glydea motors and Z-Wave, an interoperable, 2-way RF mesh networking technology. Attaching discreetly to the bottom of Somfy's line of Glydea drapery motors, this new plug-in module offers seamless compatibility with third party automation systems using Z-Wave, as well as TaHomA, Somfy's own total home automation system.

Compatible with both Glydea 35 and 60e dry contact motors.

Z-Wave® is a registered trademark of Zensys Inc. and/or its subsidiaries.
