

CONVENIENCE

Sit back, **relax** and **enjoy** sun and shade

Expand your living space with simple to use and easy to install retractable awnings, pergolas and automatic solar screens that can be adapted to your lifestyle.

Imagine creating shade in an instant. Conveniently control your awning from a distance or your pergola without getting up, so you can enjoy your outdoor living space whenever you want.

Bask in sunlight or relish the shade, at a touch of a button or automatically, depending on the weather or based on a schedule. It's up to you!

Protect yourself and your family from the sun's harmful UV rays. The best way to increase energy efficiency in the summer is to stop the sun before it even enters your windows. Somfy's sun and wind sensors allow you to automatically adjust your awning, pergola, or solar screens when there is intense sun or retract upon sensing a strong gust of wind.

DID YOU KNOW?

Awnings, pergolas and exterior screens powered by Somfy are compatible with third-party home automation systems. That means you can access and control your motorized products from the same home automation remote, touch-screen, wall panel, smartphone or voice control device which also controls lighting, security, HVAC and audio-video equipment.

COMFORT

CONTROL

Somfy offers reliable and flexible solutions for bringing your outdoor space to life.

Choose from a broad range of control options such as hand-held remotes, wireless wall switches, automatic timers, sensors or a convenient app. Radio Technology Somfy® (RTS) enables you to operate your Somfy motorized products in seconds, whether you want to control a single awning, multiple screens or a group of various motorized products. RTS is omni-directional, so no line of site is required. This eliminates the need to aim the control at your awning or screen.

TELIS RTS HAND-HELD REMOTES

SOMFY is the leading global manufacturer of strong, quiet motors with electronic and app controls for interior and exterior window coverings. Over 270 million users worldwide enjoy the more than 160 million motors produced by Somfy. During the past 45+ years, Somfy engineers have designed products for both the commercial and residential markets to motorize window coverings such as interior shades, wood blinds, draperies, awnings, rolling shutters, exterior solar screens and projection screens. Somfy motorization systems are easily integrated with security, HVAC and lighting systems providing total home or building automation.

Create a **comfortable** outdoor **environment** with the touch of a button!

Awnings

Pergolas

Insect Screens

Rolling Shutters

Solar Screens

Accessories

Play with **shade** and **sun**

A motorized awning powered by Somfy instantly transforms your deck into a cool, comfortable outdoor living space. It also protects your family and home from the sun's harmful UV rays. Add a state-of-the-art sun or wind sensor to automatically react to changing weather conditions. According to the US Department of Energy, awnings can reduce heat gain in your home up to 77% while in use. Imagine your energy savings!

Create an **outdoor** room

The pergola has more than one string to its bow. Open or closed, it's attractive and cozy, more accessible than a conservatory and stronger than a patio screen. It lets you maximize the enjoyment of your patio. Motorized pergolas can easily be operated from a control device of your choice. Add sun screens, which will lower, open and adjust when necessary to further manage shade and sunlight.

Dine **al'fresco**

Prevent insects from entering your indoor and outdoor living spaces, provide a soft shade from the direct glare of sunlight, and enhance your privacy at the touch of a button. Motorized screens retract out of sight when not needed. Use them in places such as windows, doors, and even larger openings to create a pleasant and pest-free outdoor area to enjoy.

Peace of mind

Rolling shutters insulate homes against weather conditions and even noise. When closed, shutters provide complete darkness and energy savings by eliminating heat gain/loss. When equipped with rigid links, they resist manual lifting thus increasing your safety. Enjoy peace of mind knowing that your home is protected while you are resting at night or whenever you are away.

Preserve your **view**

Motorized exterior screens absorb heat, reduce glare and block the sun to create your ideal ambiance. They provide a comfortable interior by blocking solar rays, which protects your furnishings, reduces glare and also saves money on heating and cooling costs. Enjoy solar shading without blocking your views.

Enjoy perfect **ambiance**

Enjoy your outdoor space more, even in the evening. The dimmable LED RTS Outdoor Light Receiver will allow you to control your patio or deck lights with the same control as your awning.
