

ROLLER SHUTTER

Solar motorization AUTOSUN 2 BHZ

Motor
Solar panel
Battery

SIMU has been a recognised specialist in solar solutions for roller shutters since 2006. All our solar motors are made in France and comply with the Act For Green eco-design requirements.

Autosun is the SIMU solar solution to motorise your roller shutter with a complete system including a motor, a battery, a solar panel and of complete choice of accessories.

Zoom on the solar system

THE SOLAR SOLUTION 100% AUTONOMOUS, WITHOUT WORK

- **Autonomous motorization system** for roof and facade roller shutters, operating with solar energy, a free, clean and renewable energy.
- **BHZ protocol:** thanks to the box and the TaHoma application, the motor sends information on its position to your smartphone.
- **No wiring:** AUTOSUN 2 BHZ does not need to be connected neither to the electrical network nor to control points (SIMU-BHz radio technology), which means no degradation of interior walls.
- **Optimized outputs:** AUTOSUN 2 BHZ has been designed to run in most geographical area.
- **Autonomy of the system:** 45 days without sun, 2 cycles per day.
- **Battery stick in alu cover:** for IP44 protection which makes it more resistant to shocks and liquid penetration.

An innovative solution that adapts to all types of roller shutters whatever your installation (renovation or new, roof or facade shutter).

Renovation

Traditional

Tunnel

CWS

Labeled Act for Green, AUTOSUN is a sustainable and responsible solution, developed according to ecodesign principles.

Motor

Solar panel

Battery

T3.5 EBHZ DC motor:
Torques: 3, 6 or 10 Nm

Solar panel:
with adhesives
or with holes

Battery:
Naked battery
or battery stick in alu cover

T3.5 EBHZ DC motorization

100% radio

- **BHZ radio technology** (868-870 MHz)
- **4 end-limit settings:** full automatic, manual, semi-automatic UP and semi-automatic DOWN.
- **Adjustment of the end limit with reduced speed** in manual end-limit adjustment to ease the setting.
- **Motor cable:** with a 20 cm black PVC cable, with 2 connectors 2 points and with mistakeproofing and a 30 cm antenna. Reduced size of the connectors to ease the integration inside the side frame.
- **Functions:**
 - Stop on obstacle: the motor will stop during the closing if it meets an obstacle.
 - Frost detection: the motor will stop during the opening if the shutter curtain is stuck in the guide rails by frost or if the bottom lath is locked.
 - Intermediary position: which can be adjusted to the user's need. Push "STOP" button of the transmitter to move the roller shutter to the favorite position.
 - Soft start & Soft stop: the motor will start in reduced speed during the opening and will stop in reduced speed during the opening and closing of the roller shutter.
- **Compatible with all SIMU-BHZ transmitters and automatic devices, such as TaHoma box.**

Technical characteristics

La : Drilling dimensions of tubes.
Lb : Adapted motor size inside the tube.
Lc : Total motor length with adaptor.

POWER SUPPLY	12 Volts
END-LIMIT	Electronic system with operating limited to 3 min.
PROTECTION INDEX	IP 44
POWER CABLE	Long. 0.2 meters, 3x0.75 mm ² wires, Ø5mm PVC black with two connectors.
SIMU-HZ RADIO FREQUENCY	Tri-band radio frequency 868-870 MHz with possibility to edit 8 times the order.
SECURE COMMUNICATION	Encrypted control orders + Rolling code with 16 million possible combinations.
RANGE	BHZ wall transmitter: ~150m in free field and ~15m through 2 reinforced concrete walls. Box TaHoma + BHZ mobile remote control: ~200m in free field and ~20m through 2 reinforced concrete walls.
MOTOR HEAD THICKNESS	15 mm.
END-LIMIT ADJUSTMENT	Every 60 cycles during 4 cycles.

STANDARDS

Battery naked or stick in alu cover

NAKED BATTERY

Cable of 25 cm

BATTERY STICK IN ALU COVER

Cable 60 cm

Cable 30 cm

Wide range of batteries to suit at best all installation:

- 1 battery stick in alu cover and its cable of 30cm.
- 1 battery stick in alu cover and its cable of 60cm.
- 1 naked battery, without alu cover and its cable of 25cm. Mounting by pop rivet of the specific brackets and elastics to guarantee the fixing inside the roller shutter box.
- Reduced size of the connector to ease the integration inside the side frame.
- Battery in alu cover: possibility to connect and disconnect the battery cable easily without opening the roller shutter box. Indeed, once the plastic cover of the stick is removed you can unplug/plug the battery cable.

Extension cable with connectors for a quick disconnect

Fixing on the support to hold the cable in place

INSTALLATION	ADVANTAGES	RECOMMENDED BATTERIES
Battery outside the roller shutter box: - between the guide rail and the wall - behind the Roller Shutter box	Easy access to the battery for resetting the system or replacement of the battery	- Battery in alu cover and its cable of 30cm. - Battery in alu cover and its cable of 60cm. (Fixing with adhesive or brackets.)
Battery inside the roller shutter box	Full integration in factory, nothing to do on site, the roller shutter is ready for use/installation on site.	- Battery in alu cover and its cable of 30cm (Fixing with adhesive or brackets). - Naked battery and its cable of 25cm (Fixing with specific brackets & elastics). Only for RENOVATION roller shutter boxes.

Technical characteristics

BATTERY	Ni-MH
NOMINAL VOLTAGE	12 Volts
CAPACITY	2.2 Ah
AMBIENT TEMPERATURE OF USE	from -20°C to +70°C
PROTECTION INDEX	IP X4
LIFETIME	± 8 years
WEIGHT & DIMENSIONS	Naked battery: 430 x 23.5mm - 520 gr Battery stick in alu cover: 570 x 27 x 27 mm with 0.3 m cable (2-point connector) - 730 gr 570 x 27 x 27 mm with 0.6 m cable (2-point connector) - 760 gr

Solar panel with holes or adhesives

- New solar panel with adhesives to stick it directly on the roller shutter box without making holes.

- Solar panel in resin.
- Aesthetic design.
- 2 possible fixing:
 - Directly on the roller shutter box by pop rivets or with adhesive.
 - On the inclined brackets, on the roller shutter box or on the wall to capture more sun.
- All solar panels have a cable length of 20cm.

Technical characteristics

MATERIAL	Resin panel
TYPE OF PANEL	Photovoltaics monocristalin
PROTECTION INDEX	IP X4
DELIVERED VOLTAGE	195.8 mA maxi.
POWER	3.2 W
TYPE OF CABLE	Cable of 200mm with 2-point connector - type Molex plug (male) and rubber cable-gland for impermeability.
DIMENSION	470 x 60 x 6 mm
WEIGHT	230 g

Accessory bracket for antenna

To guarantee radio performances, it is mandatory to place the antenna outside the roller shutter box. This bracket enables to place 10cm of the antenna cable outside the roller shutterbox and 1cm away from a metallic part.
